

Experiential Learning Conference

Explore Creative Arts and Alternative Therapies for Working with Trauma

Join Health & Disability Advocates and the Institute for Therapy through the Arts for a day of experiential learning for working with clients who have experienced trauma.

Through hands-on experience, structured reflection, and modeling through practice, participants will develop an understanding of theory and application of various techniques used in alternative and creative arts therapies.

The morning keynote address will be presented by Clinical Psychologist, Art Therapist, and Trauma Specialist, Dr. Marni Rosen, PsyD, ATR. She will focus on the theory & history of Creative Arts Therapy for working with individuals who have experienced trauma. Following the keynote address, participants can choose to attend 4 out of 6 immersion sessions where they will experience therapy as the client, complete with explanation about each form of therapy.

This conference is a great way for both beginners and experienced clinicians to practice and learn more about a variety of alternative forms of therapy that are available to their clients.
